DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Invention I and Species 1 in the reply filed on 10/18/05 is acknowledged. The traversal is on the ground(s) that many of the claimed features are highly similar and thus there is no undue burden on the Examiner. This is not found persuasive because there are many major differences among the various species, for example they don't all use jaws, some are manual and some automatic, some rotate the valve stem and some do not, etc.

The requirement is still deemed proper and is therefore made FINAL.

Claims 16-27 and 40-56 are therefore withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Invention or Species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 10/18/05.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the energy storage device must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended

Art Unit: 3751

replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 9-15 and 33-39 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3751

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 28-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Bayles.

The Bayles reference discloses an apparatus which is capable of freeing seized valves as claimed comprising means for enabling repeated alternate impact force (piston B and its pressure fluid control system), gripping means/jaws Z with means for enhancing engagement/elongate teeth (see the teeth on the jaws Z in Figure 2 and the "serrated chuck" referred to in lines 77-78), and an energy storage device L.
